

ELECTRICAL SYSTEMS THAT

KEEP THE MISSION POWERED

CAPABILITY STATEMENT

NAICS 238210 | 2026

GOVAGE

Mission-ready capability and coordinated delivery

A coordinated portfolio for connected facilities

Electrical equipment, wiring, qualified trade support, and commissioning aligned to the facility requirement.

NAICS 238210 PORTFOLIO

- **POWER DISTRIBUTION**
Switchgear, panels, feeders, transformers, and controls
- **WIRING & CONDUIT**
Branch circuits, raceways, cable tray, grounding, and bonding
- **LIGHTING & CONTROLS**
Interior, exterior, roadway, airfield, and control systems
- **STRUCTURED CABLING**
Copper network cable, pathways, racks, and patching
- **FIBER & LOW VOLTAGE**
Fiber installation, splicing, alarms, and signaling
- **TESTING & TURNOVER**
Verification, labeling, commissioning, and documentation

MISSION-READY BY DESIGN

Plan. Coordinate. Deliver.

A practical path from a specialized requirement to a supportable, compliant operational result.

FEDERAL FACILITIES

DATA & COMMUNICATIONS

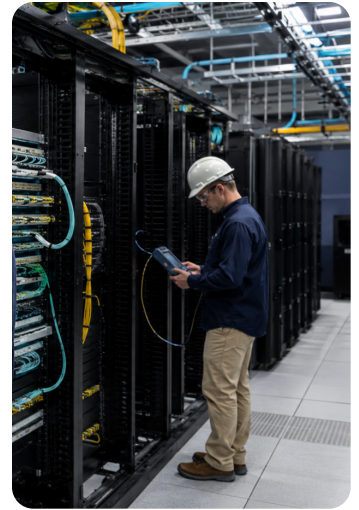

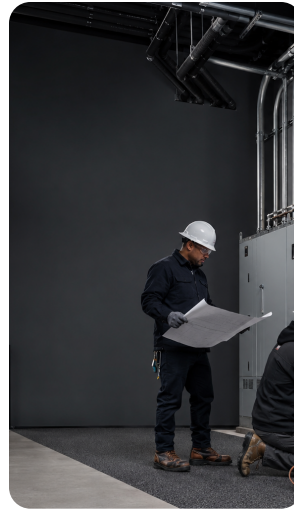

AIRFIELDS & EXTERIOR SYSTEMS

GovAge coordinates OEM equipment, qualified electrical trade partners, materials, schedules, quality controls, testing, and closeout for federal facility work.

One accountable path for electrical and wiring requirements

GovAge coordinates electrical products and qualified trade partners for new work, additions, alterations, maintenance, and repair in government facilities.

We align equipment, licensed labor, site access, safety plans, submittals, material logistics, testing, commissioning, and closeout around the contract requirement.

01

Site & scope planning

Review drawings, loads, pathways, existing conditions, phasing, outages, security requirements, and applicable installation standards.

02

Material & trade coordination

Align OEM equipment, approved materials, qualified electrical partners, submittals, permits, safety controls, and schedule.

03

Installation & commissioning

Coordinate field execution, inspections, testing, labeling, as-built documentation, training interfaces, and turnover.

Three capability domains. One accountable partner.

ELECTRICAL POWER & DISTRIBUTION

Switchgear, transformers, panels, feeders, raceway, cable tray, grounding, bonding, branch circuits, emergency power interfaces, maintenance, and repair.

LIGHTING & CONTROL SYSTEMS

Interior and exterior lighting, roadway and airfield lighting, lighting controls, electrical signaling, alarms, environmental controls, and system upgrades.

COMMUNICATIONS & LOW-VOLTAGE WIRING

Structured copper cabling, fiber optic installation and splicing, equipment-room buildout, pathways, racks, patch panels, testing, and documentation.

The right installation is safe, code-aware, coordinated to the facility, fully tested, and documented for the team that operates it.

OUR STRATEGY

One lifecycle. One accountable path forward.

01

PLAN

Confirm performance requirements, site conditions, loads, pathways, phasing, outage windows, security, code obligations, and acceptance criteria.

02

MOBILIZE & INSTALL

Coordinate qualified trade partners, materials, permits, safety plans, site access, schedule, field supervision, and change control.

03

TEST & TURN OVER

Complete inspections, electrical and cable testing, labeling, deficiency correction, as-builts, O&M; documentation, and turnover support.

**Mission-led. Compliance-aware.
Built to perform and sustain.**

Registered, ready, and accountable

GovAge is an active SAM-registered entity authorized for all awards.
