

MECHANICAL SYSTEMS THAT

KEEP FACILITIES MISSION-READY

CAPABILITY STATEMENT

NAICS 238220 | 2026

GOVAGE

Mission-ready capability and coordinated delivery

A coordinated portfolio for reliable facilities

Plumbing, HVAC, hydronic, ventilation, sprinkler, and refrigeration work aligned to the operating requirement.

NAICS 238220 PORTFOLIO

- **HVAC SYSTEMS**
Air handling, heating, cooling, equipment replacement
- **PLUMBING**
Domestic water, fixtures, drainage, and building connections
- **HYDRONIC & BOILER**
Pumps, valves, piping, heat exchange, and controls
- **DUCT & VENTILATION**
Supply, return, exhaust, dust collection, and balancing
- **FIRE SPRINKLER**
Piping, pumps, valves, sprinkler installation and testing
- **REFRIGERATION**
Commercial and industrial systems, startup, and service

MISSION-READY BY DESIGN

Plan. Coordinate. Deliver.

A practical path from a specialized requirement to a supportable, compliant operational result.

FEDERAL FACILITIES

MECHANICAL PLANTS

MISSION & LAB ENVIRONMENTS

GovAge coordinates equipment, qualified mechanical trade partners, parts, field schedules, startup resources, acceptance documentation, and lifecycle support.

One accountable path for mechanical building systems

GovAge coordinates equipment and qualified trade partners for plumbing, heating, air-conditioning, ventilation, refrigeration, and fire-sprinkler work.

We align site surveys, equipment selection, licensed labor, submittals, logistics, installation, startup, testing, balancing, training interfaces, and closeout.

01

Site & system planning

Review loads, capacity, utilities, controls, tie-in points, phasing, outages, occupied-space constraints, and acceptance criteria.

02

Equipment & trade coordination

Align OEM equipment, qualified mechanical partners, submittals, permits, safety controls, materials, and schedule.

03

Startup & acceptance

Coordinate installation, pressure and functional testing, startup, balancing interfaces, inspections, O&M; documentation, and turnover.

Three capability domains. One accountable partner.

HVAC & VENTILATION

Heating and cooling equipment, air handlers, furnaces, ductwork, exhaust, dust collection, cooling towers, hydronic systems, controls interfaces, and balancing coordination.

PLUMBING & WATER SYSTEMS

Domestic water, drainage, fixtures, pumps, piping, valves, backflow assemblies, building sewer connections, repairs, alterations, and replacement work.

FIRE SPRINKLER & REFRIGERATION

Fire-sprinkler piping and components, commercial and industrial refrigeration systems, specialty mechanical equipment, startup, testing, and documentation.

The right mechanical system fits the load, integrates with the facility, starts up correctly, and remains supportable after turnover.

OUR STRATEGY

One lifecycle. One accountable path forward.

01 **PLAN**

Define loads, capacity, utilities, controls, existing conditions, phasing, outage windows, site access, compliance obligations, and acceptance criteria.

02 **MOBILIZE & INSTALL**

Coordinate qualified trades, OEM equipment, permits, submittals, safety plans, material delivery, field execution, and change control.

03 **START UP & SUSTAIN**

Complete testing, startup, balancing interfaces, inspections, deficiency correction, training support, O&M; documentation, and warranty follow-through.

**Mission-led. Compliance-aware.
Built to perform and sustain.**

Registered, ready, and accountable

GovAge is an active SAM-registered entity authorized for all awards.
