

COATED TEXTILES THAT

PERFORM UNDER PRESSURE

CAPABILITY STATEMENT

NAICS 313320 | 2026

GOVAGE

Mission-ready capability and coordinated delivery

A coordinated portfolio for technical textiles

Coating, laminating, varnishing, waxing, and rubberizing capabilities aligned to end-use performance.

NAICS 313320 PORTFOLIO

- **POLYMER COATING**
Protective, functional, and performance surface systems
- **LAMINATION**
Textile-to-film, textile-to-textile, and composite structures
- **VARNISH & WAX**
Surface treatment for handling, barrier, and finish needs
- **RUBBERIZED FABRICS**
Flexible, durable, weather-resistant coated textiles
- **BARRIER PERFORMANCE**
Water, abrasion, chemical, and environmental resistance
- **QUALITY VERIFICATION**
Thickness, adhesion, flexibility, finish, and lot controls

MISSION-READY BY DESIGN

Plan. Coordinate. Deliver.

A practical path from a specialized requirement to a supportable, compliant operational result.

DEFENSE & FEDERAL SUPPLY

INDUSTRIAL & UTILITY

FIELD & MISSION APPLICATIONS

GovAge coordinates qualified production partners, materials, performance requirements, samples, quality records, conversion, packaging, and program delivery.

One accountable path for coated and laminated textiles

GovAge coordinates specialized fabric-coating production partners for coated, laminated, varnished, waxed, and rubberized textiles and apparel materials.

We align substrates, coating chemistry, performance targets, process controls, samples, qualification testing, production lots, documentation, and delivery.

01

Performance definition

Translate end use into substrate, coating, weight, thickness, adhesion, flexibility, color, finish, barrier, and environmental requirements.

02

Production coordination

Align qualified mills, raw materials, trials, samples, tooling, production scheduling, process controls, conversion, and packaging.

03

Quality & traceability

Coordinate inspection plans, material certifications, lot records, test results, nonconformance controls, and delivery documentation.

Three capability domains. One accountable partner.

COATING & IMPREGNATION

Protective and functional coating systems applied to textile substrates for weatherability, water resistance, abrasion, chemical exposure, handling, and service life.

LAMINATION & COMPOSITE STRUCTURES

Textile-to-film and textile-to-textile laminates, barrier layers, bonded constructions, reinforced materials, controlled thickness, and surface finish.

TESTING & PROGRAM SUPPORT

Sampling, trials, qualification coordination, adhesion and flexibility checks, thickness and weight controls, lot traceability, documentation, packaging, and delivery.

The right coated textile begins with the application, controls the process, verifies performance, and arrives with the records to support acceptance.

OUR STRATEGY

One lifecycle. One accountable path forward.

01

DEFINE

Confirm substrate, application, coating or lamination system, dimensional requirements, appearance, exposure conditions, performance tests, and acceptance criteria.

02

PRODUCE

Coordinate qualified production partners, materials, trials, process controls, production scheduling, converting, packaging, and change management.

03

VERIFY & DELIVER

Complete inspections, test documentation, lot traceability, nonconformance resolution, packaging verification, logistics, and final delivery.

**Mission-led. Compliance-aware.
Built to perform and sustain.**

Registered, ready, and accountable

GovAge is an active SAM-registered entity authorized for all awards.
