

CONVERTED PAPER THAT

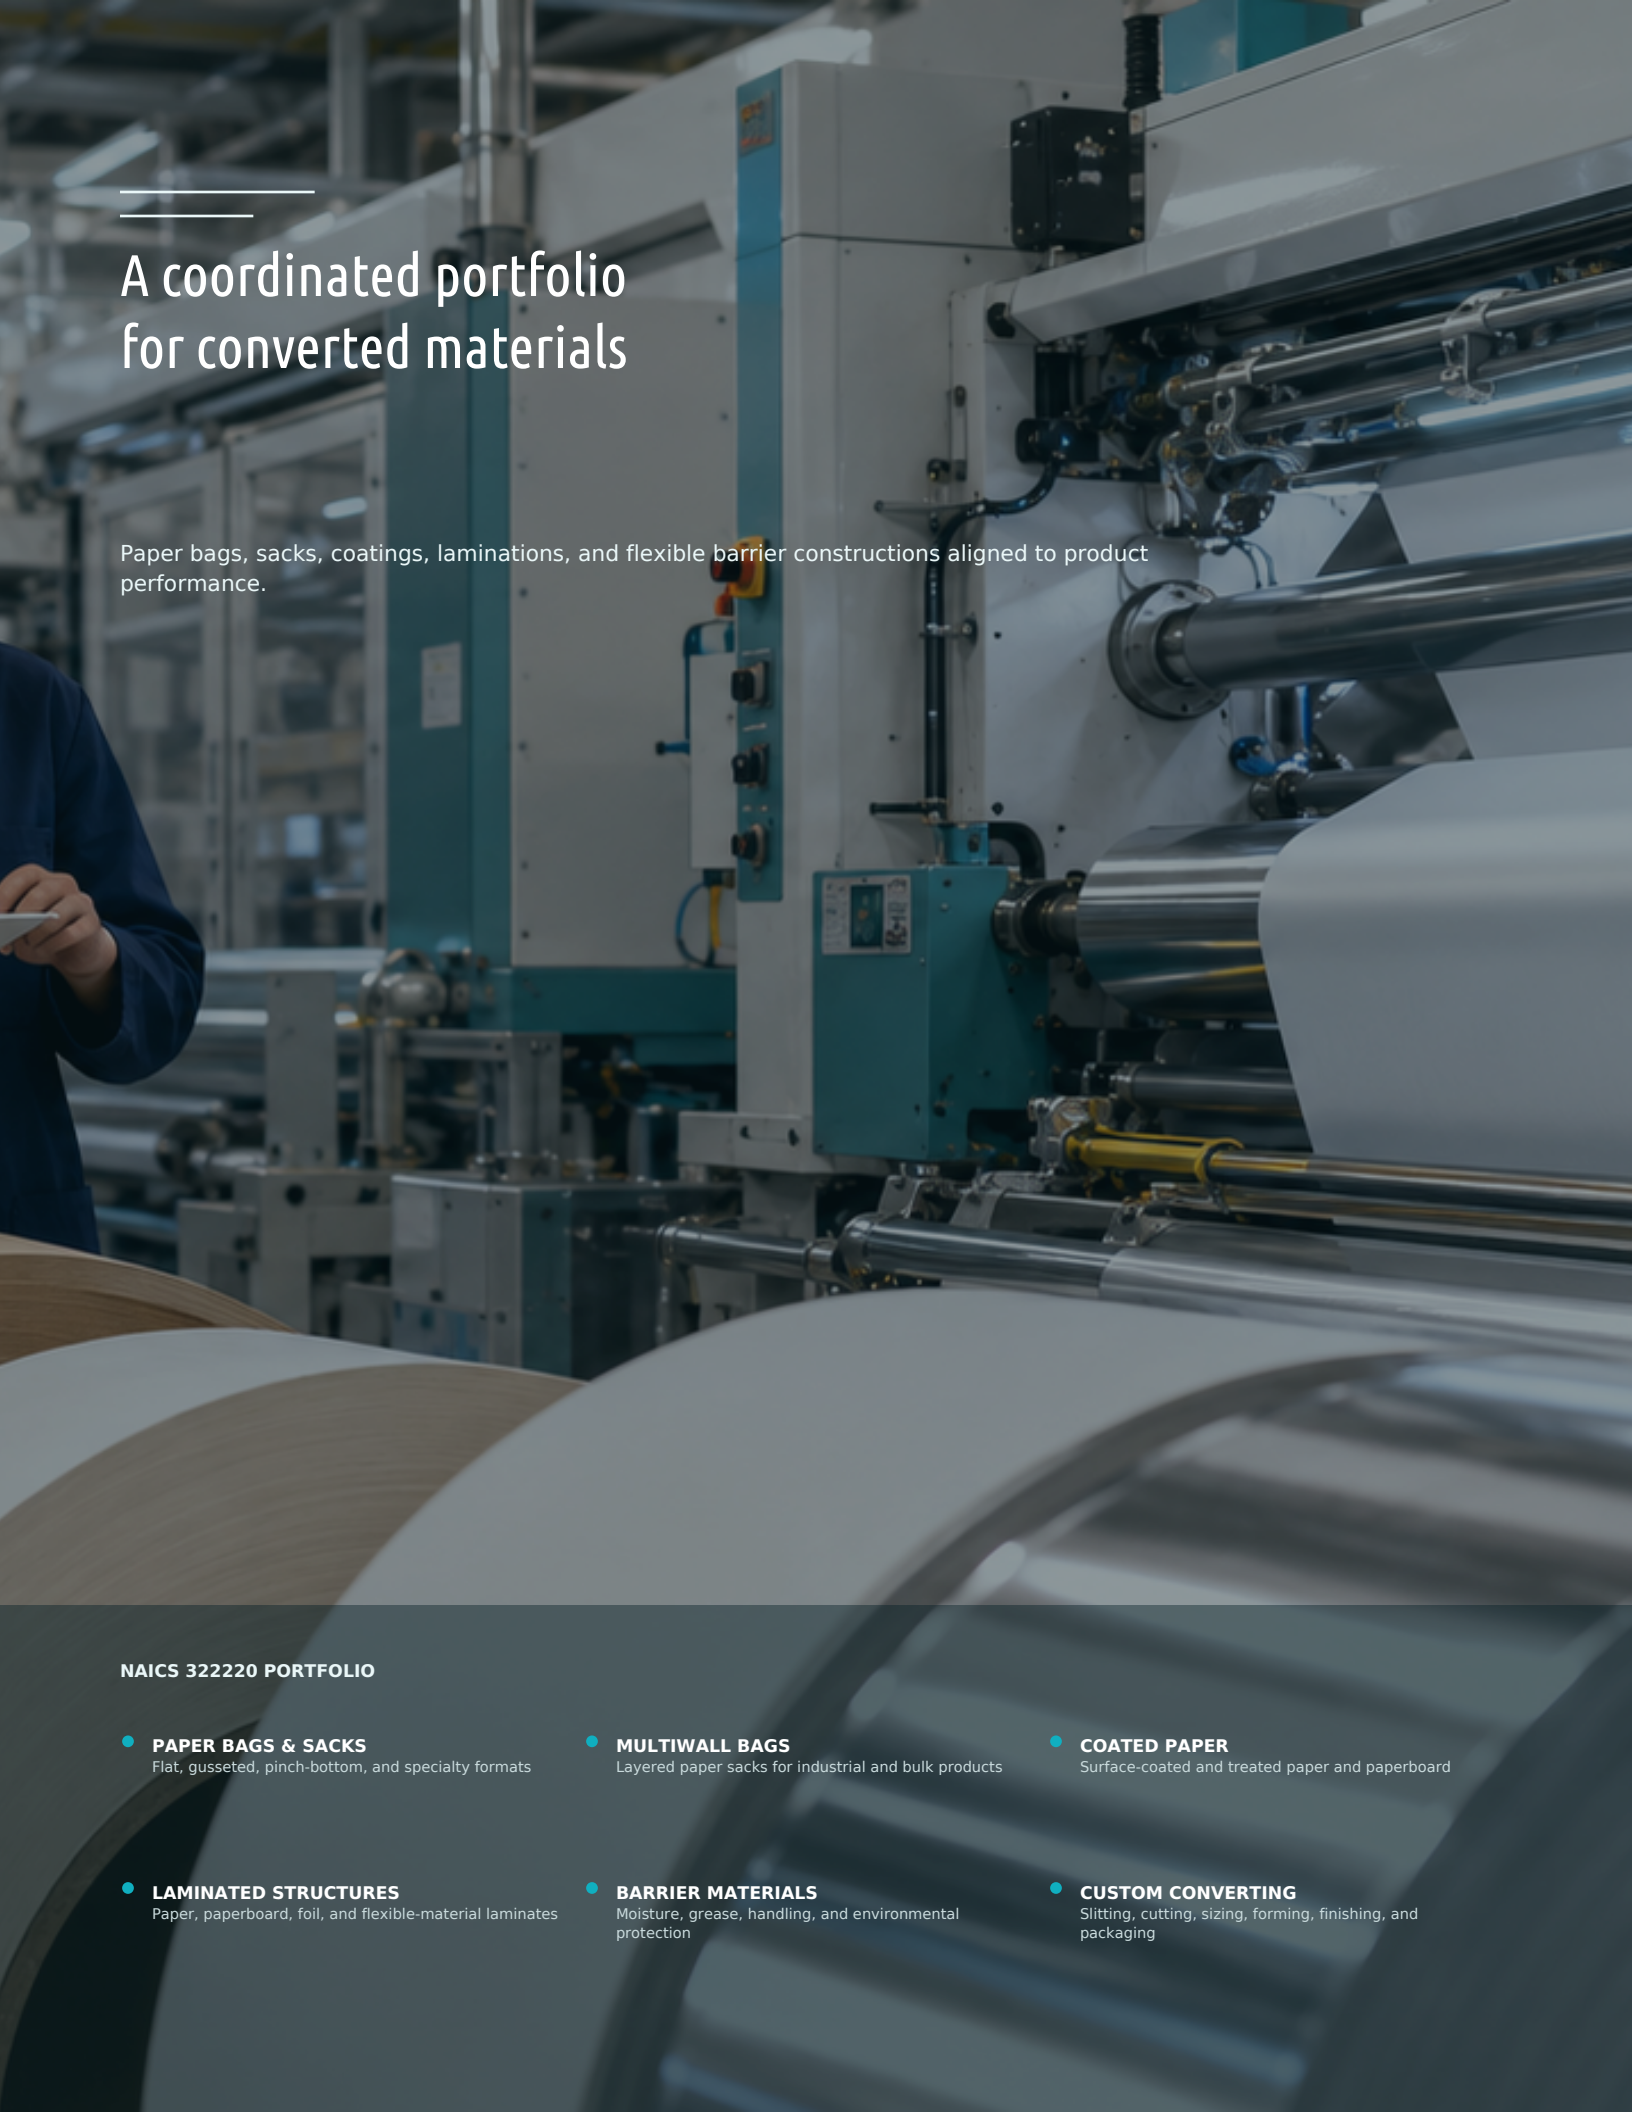

PROTECTS EVERY MISSION

CAPABILITY STATEMENT

NAICS 322220 | 2026

GOVAGE

Mission-ready capability and coordinated delivery

A coordinated portfolio for converted materials

Paper bags, sacks, coatings, laminations, and flexible barrier constructions aligned to product performance.

NAICS 322220 PORTFOLIO

- **PAPER BAGS & SACKS**
Flat, gusseted, pinch-bottom, and specialty formats
- **MULTIWALL BAGS**
Layered paper sacks for industrial and bulk products
- **COATED PAPER**
Surface-coated and treated paper and paperboard
- **LAMINATED STRUCTURES**
Paper, paperboard, foil, and flexible-material laminates
- **BARRIER MATERIALS**
Moisture, grease, handling, and environmental protection
- **CUSTOM CONVERTING**
Slitting, cutting, sizing, forming, finishing, and packaging

MISSION-READY BY DESIGN

Plan. Coordinate. Deliver.

A practical path from a specialized requirement to a supportable, compliant operational result.

FEDERAL & DEFENSE SUPPLY

INDUSTRIAL PACKAGING

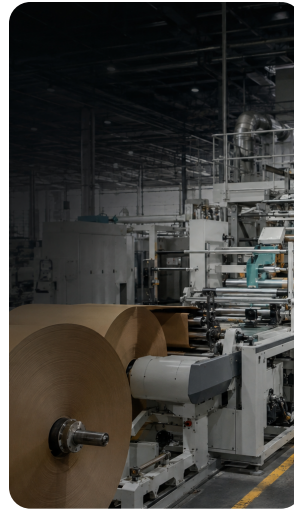

LOGISTICS & MATERIAL PROTECTION

GovAge coordinates qualified manufacturers, substrates, coating and lamination systems, bag construction, samples, quality records, packaging, and delivery.

One accountable path for paper bags and treated materials

GovAge coordinates qualified production partners for paper bags, multiwall sacks, coated and treated paper, laminated paperboard, foil composites, and related flexible materials.

We align material structure, dimensions, barrier performance, seams and closures, samples, production controls, lot documentation, packing, and delivery.

01

Product & material definition

Translate end use into paper grade, basis weight, dimensions, layers, coating or lamination, barrier, closure, strength, and packing requirements.

02

Production sourcing

Align qualified converters, raw materials, samples, trials, tooling, production schedule, process controls, and approved alternatives.

03

Quality & logistics

Coordinate inspections, certifications, lot traceability, packaging verification, palletization, freight, delivery windows, and acceptance support.

Three capability domains. One accountable partner.

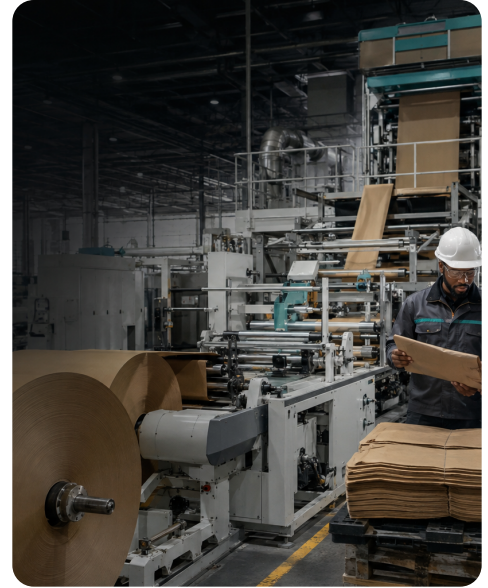

BAGS & MULTIWALL SACKS

Paper and composite bags, industrial sacks, multiwall constructions, coated or laminated structures, engineered seams and closures, and application-specific dimensions.

COATED & TREATED PAPER

Surface-coated paper and paperboard, waxed and treated structures, functional finishes, grease and moisture resistance, and controlled surface properties.

LAMINATION & CUSTOM CONVERTING

Paper, paperboard, foil, and flexible-material laminates; slitting, cutting, sizing, forming, finishing, quality verification, packaging, and program delivery.

The right converted-paper product protects the contents, runs reliably in use, meets the specification, and arrives ready for acceptance.

OUR STRATEGY

One lifecycle. One accountable path forward.

01

DEFINE

Confirm application, material structure, dimensions, strength, barrier, finish, closure, print boundary, packing, testing, and acceptance requirements.

02

PRODUCE

Coordinate qualified converters, substrates, coatings, laminations, trials, process controls, manufacturing schedule, packaging, and change management.

03

VALIDATE & DELIVER

Complete inspections, certifications, lot traceability, packing verification, nonconformance resolution, freight, delivery, and acceptance support.

**Mission-led. Compliance-aware.
Built to perform and sustain.**
