

ENGINEERED MATERIALS THAT

FORM THE MISSION FOUNDATION

CAPABILITY STATEMENT

NAICS 327390 | 2026

GOVAGE

Mission-ready capability and coordinated delivery

A coordinated portfolio for structural materials

Material grades, shapes, finishes, quality records, and logistics aligned to drawings and field use.

NAICS 327390 PORTFOLIO

- **MATERIAL SELECTION**
Grades, formulations, dimensions, properties, and alternates
- **FORMING & PROCESSING**
Rolling, casting, molding, cutting, and fabrication interfaces
- **SURFACE & FINISH**
Coatings, textures, protection, and appearance requirements
- **QUALITY CONTROL**
Dimensional, mechanical, visual, and lot verification
- **DOCUMENTATION**
Certifications, test reports, submittals, and traceability
- **LOGISTICS**
Packaging, lifting, staging, freight, and jobsite delivery

MISSION-READY BY DESIGN

Plan. Coordinate. Deliver.

A practical path from a specialized requirement to a supportable, compliant operational result.

PUBLIC WORKS & FACILITIES

INFRASTRUCTURE PROGRAMS

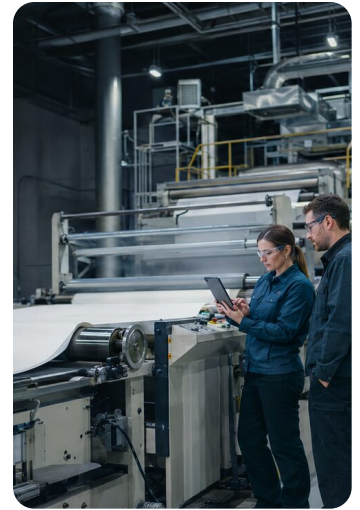

INDUSTRIAL & FIELD APPLICATIONS

GovAge coordinates qualified manufacturers, engineered material requirements, production controls, certifications, packaging, freight, and delivery support.

One accountable path for engineered material requirements

GovAge coordinates qualified manufacturers and material resources for other concrete product manufacturing serving federal and institutional customers.

We align drawings and specifications, grades, dimensions, finishes, samples, production schedules, inspections, certifications, packaging, freight, and delivery milestones.

01

Specification alignment

Translate drawings and end use into material grade, composition, dimensions, tolerances, finish, strength, testing, and acceptance criteria.

02

Production sourcing

Align qualified manufacturers, raw materials, tooling, samples, production schedules, process controls, and approved alternates.

03

Verification & logistics

Coordinate inspections, certifications, lot traceability, packaging, lifting, freight, delivery windows, and receiving documentation.

Three capability domains. One accountable partner.

MATERIAL & PRODUCT DEFINITION

Grade, formulation, dimensions, tolerances, strength, finish, exposure conditions, interface requirements, samples, and approved alternatives.

PRODUCTION & PROCESS CONTROL

Qualified manufacturing, raw-material control, forming, processing, surface treatment, inspection planning, scheduling, and change management.

QUALITY & PROGRAM DELIVERY

Certifications, test reports, lot traceability, packaging, freight, phased deliveries, receiving records, and acceptance support.

The right material solution begins with the application, controls production, verifies conformance, and arrives ready for use.

OUR STRATEGY

One lifecycle. One accountable path forward.

01 DEFINE

Confirm drawings, material properties, dimensions, tolerances, finish, exposure, testing, documentation, packaging, and delivery requirements.

02 PRODUCE

Coordinate qualified manufacturers, materials, tooling, samples, process controls, inspections, schedule, and approved changes.

03 VERIFY & DELIVER

Complete certifications, traceability, dimensional and visual checks, packaging verification, freight, receiving records, and acceptance support.

**Mission-led. Compliance-aware.
Built to perform and sustain.**

Registered, ready, and accountable

GovAge is an active SAM-registered entity authorized for all awards.
