

PRECISION METALWORK THAT

HOLDS THE MISSION TOGETHER

CAPABILITY STATEMENT

NAICS 332439 | 2026

GOVAGE

Mission-ready capability and coordinated delivery

A coordinated portfolio for fabricated metal

Components, assemblies, finishes, quality records, and delivery aligned to drawings and service conditions.

NAICS 332439 PORTFOLIO

• STRUCTURAL FABRICATION

Frames, shapes, assemblies, brackets, and supports

• HARDWARE & COMPONENTS

Mechanical hardware, fittings, closures, and interfaces

• PIPE, VALVES & FITTINGS

Fabricated piping products and flow-control components

• CONTAINERS & ENCLOSURES

Metal containers, cabinets, guards, and housings

• COATING & FINISHING

Protective coatings, plating, engraving, and marking

• QUALITY & TRACEABILITY

Inspection, material records, testing, and lot controls

A large industrial manufacturing facility with high ceilings and steel beams. In the foreground, there are large metal pipes and flanges. In the background, a robotic arm is visible, and a yellow overhead crane spans the width of the hall.

MISSION-READY BY DESIGN

Plan. Coordinate. Deliver.

A practical path from a specialized requirement to a supportable, compliant operational result.

FEDERAL FACILITIES

DEFENSE & INDUSTRIAL PROGRAMS

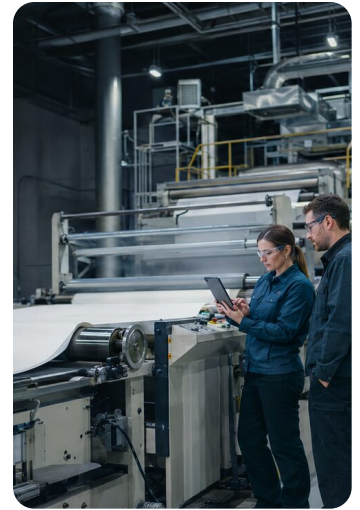

FIELD & INFRASTRUCTURE SUPPORT

GovAge coordinates qualified metal manufacturers, materials, drawings, process controls, special finishes, inspections, documentation, and program delivery.

One accountable path for fabricated metal requirements

GovAge coordinates qualified manufacturing partners and production resources for other metal container manufacturing serving federal and institutional customers.

We align drawings, materials, tolerances, welding and machining processes, coatings, inspections, certifications, packaging, logistics, and delivery schedules.

01

Drawing & material review

Confirm geometry, interfaces, alloys, tolerances, loads, welding, machining, finish, inspection, marking, and documentation requirements.

02

Manufacturing coordination

Align qualified fabricators, material sourcing, tooling, process plans, special processes, schedule, and change control.

03

Inspection & delivery

Coordinate dimensional and visual inspection, certifications, traceability, protective packaging, freight, and acceptance records.

Three capability domains. One accountable partner.

FABRICATION & MACHINING

Structural assemblies, formed components, containers, hardware, valves, fittings, pipe products, cutting, bending, welding, and machining.

COATING & SPECIAL PROCESSES

Protective finishes, metal coating, engraving, marking, heat-treatment interfaces, corrosion control, and documented process controls.

QUALITY & PROGRAM DELIVERY

Material certifications, weld and process records, inspection reports, lot traceability, packaging, freight, and acceptance support.

The right fabricated product meets the drawing, controls each critical process, verifies conformance, and arrives protected for installation.

OUR STRATEGY

One lifecycle. One accountable path forward.

01 DEFINE

Confirm drawings, materials, tolerances, loads, interfaces, special processes, inspection, documentation, packaging, and schedule.

02 FABRICATE

Coordinate qualified manufacturers, raw materials, tooling, welding, machining, finishing, inspections, and change management.

03 VERIFY & DELIVER

Complete dimensional and visual checks, certifications, traceability, protective packaging, freight, receiving records, and acceptance support.

**Mission-led. Compliance-aware.
Built to perform and sustain.**

Registered, ready, and accountable

GovAge is an active SAM-registered entity authorized for all awards.
