

DIGITAL SYSTEMS THAT

CONNECT THE MISSION

CAPABILITY STATEMENT

NAICS 518210 | 2026

GOVAGE

Mission-ready capability and coordinated delivery

A coordinated portfolio for digital operations

Hardware, software, infrastructure, integration, training, and support aligned to mission and security needs.

NAICS 518210 PORTFOLIO

● COMPUTE & ENDPOINTS

Computers, storage, peripherals, terminals, and accessories

● SOFTWARE

Commercial platforms, licensing, development, and integration

● INFRASTRUCTURE

Data center, hosting, cloud, processing, and platform services

● SYSTEMS DESIGN

Architecture, configuration, interoperability, and migration

● OPERATIONS

Facilities management, monitoring, administration, and support

● TRAINING & ADOPTION

Role-based instruction, documentation, and knowledge transfer

MISSION-READY BY DESIGN

Plan. Coordinate. Deliver.

A practical path from a specialized requirement to a supportable, compliant operational result.

GovAge coordinates technology manufacturers, publishers, integrators, infrastructure providers, training, documentation, and lifecycle support.

ENTERPRISE IT

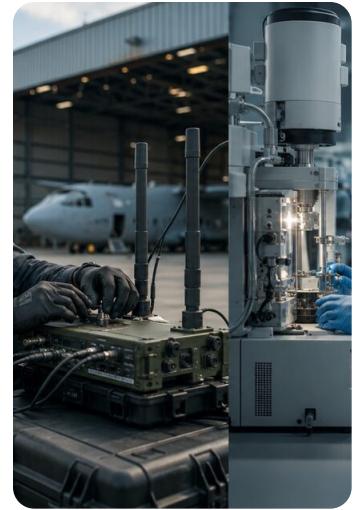

DATA & CLOUD OPERATIONS

MISSION & TRAINING SYSTEMS

One accountable path for digital systems and IT services

GovAge coordinates technology products, publishers, platforms, and technical partners for computing infrastructure providers, data processing, web hosting, and related services serving federal and institutional customers.

We align users, architecture, security requirements, hardware, software, licensing, configuration, integration, migration, training, documentation, and ongoing support.

01

Mission & architecture discovery

Confirm users, workloads, data, interfaces, performance, availability, security, hosting, licensing, support, and acceptance requirements.

02

Technology & integration alignment

Coordinate OEMs, publishers, platforms, configuration, interoperability, implementation, migration, testing, and change control.

03

Adoption & lifecycle support

Align training, documentation, monitoring, administration, warranty, licensing, refresh, service levels, and knowledge transfer.

Three capability domains. One accountable partner.

HARDWARE & SOFTWARE

Computers, storage, peripherals, commercial software, licensing, custom programming, integrations, configuration, accessories, and warranty support.

INFRASTRUCTURE & SYSTEMS DESIGN

Data center, hosting, cloud, processing, architecture, facilities management, interoperability, migration, testing, and operational readiness.

OPERATIONS & ADOPTION

Administration, monitoring, service coordination, computer training, documentation, user adoption, refresh planning, and lifecycle continuity.

The right digital solution fits the mission, integrates securely, performs reliably, and remains supportable as requirements evolve.

OUR STRATEGY

One lifecycle. One accountable path forward.

01

DISCOVER

Define users, workloads, data, interfaces, architecture, security, performance, availability, training, support, and acceptance criteria.

02

DESIGN & DEPLOY

Coordinate technology partners, products, licensing, configuration, integration, migration, testing, documentation, and change management.

03

OPERATE & EVOLVE

Support monitoring, administration, training, warranty, renewals, refresh, issue resolution, knowledge transfer, and continuous improvement.

**Mission-led. Compliance-aware.
Built to perform and sustain.**
