

SECURITY SYSTEMS THAT

PROTECT THE MISSION

CAPABILITY STATEMENT

NAICS 561621 | 2026

GOVAGE

Mission-ready capability and coordinated delivery

A coordinated portfolio for physical security

Detection, access, surveillance, alarms, integration, testing, and support aligned to the protected environment.

NAICS 561621 PORTFOLIO

- **ACCESS CONTROL**
Readers, credentials, controllers, locks, and management
- **VIDEO SURVEILLANCE**
Cameras, recording, monitoring, analytics, and storage
- **INTRUSION DETECTION**
Sensors, alarms, annunciation, and response interfaces
- **SYSTEM INTEGRATION**
Networks, power, software, interfaces, and migration
- **INSTALLATION & TESTING**
Site work, configuration, verification, and acceptance
- **LIFECYCLE SUPPORT**
Training, documentation, maintenance, warranty, and refresh

MISSION-READY BY DESIGN

Plan. Coordinate. Deliver.

A practical path from a specialized requirement to a supportable, compliant operational result.

FEDERAL FACILITIES

CONTROLLED & CRITICAL AREAS

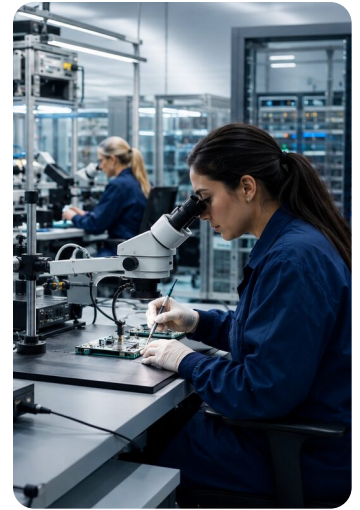

CAMPUS & REMOTE SITES

GovAge coordinates security manufacturers, qualified integrators, system design, equipment, installation interfaces, testing, documentation, and lifecycle support.

One accountable path for integrated security requirements

GovAge coordinates security technology, qualified integrators, and lifecycle resources for security systems services (except locksmiths) serving federal and institutional customers.

We align protected assets, users, threat-informed requirements, coverage, equipment, networks, power, configuration, installation, testing, training, records, and support.

01

Site & protection planning

Confirm assets, users, zones, coverage, interfaces, network, power, response, site access, standards, and acceptance criteria.

02

System & integrator alignment

Coordinate manufacturers, qualified integrators, equipment, software, submittals, installation interfaces, schedule, and change control.

03

Testing & sustainment

Align configuration, commissioning, acceptance testing, training, documentation, maintenance, warranty, spares, and refresh planning.

Three capability domains. One accountable partner.

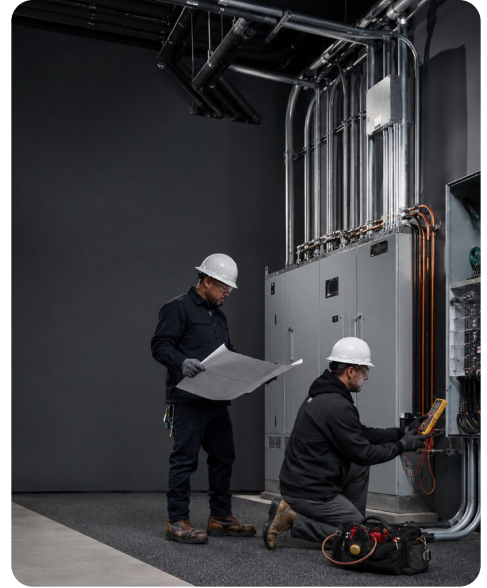

DETECTION & ACCESS SYSTEMS

Access control, credentials, intrusion detection, alarm annunciation, video surveillance, recording, monitoring, sensors, and field devices.

INTEGRATION & DEPLOYMENT

System design, networks, power, interfaces, software, configuration, installation coordination, migration, testing, and operational transition.

OPERATIONS & LIFECYCLE SUPPORT

Monitoring interfaces, training, documentation, maintenance, warranty, spares, issue resolution, software support, and technology refresh.

The right security solution fits the threat and site, integrates cleanly, verifies performance, and remains supportable after turnover.

OUR STRATEGY

One lifecycle. One accountable path forward.

01 ASSESS

Define protected assets, users, zones, coverage, interfaces, network, power, response, standards, schedule, and acceptance requirements.

02 DESIGN & DEPLOY

Coordinate manufacturers, integrators, equipment, software, submittals, configuration, installation interfaces, and change management.

03 TEST & SUSTAIN

Complete commissioning, acceptance testing, training, documentation, maintenance planning, warranty, spares, and lifecycle support.

**Mission-led. Compliance-aware.
Built to perform and sustain.**

Registered, ready, and accountable

GovAge is an active SAM-registered entity authorized for all awards.
